

Introducing the Square TimeSaver Cap & Base made exclusively for our 8" DuraGlass Column

New to the Turncraft product line is our 8" SQ TimeSaver C&B product. This new cap & base employs the same quickfit installation as our round 8", 10", & 12" TimeSavers. Our TimeSaver caps and bases offer the easiest & quickest installation in the industry.

Customers claim:

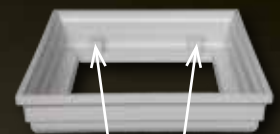

"The TimeSaver cap and base will cut your installation time in half"

- Slide the base, cap and neck ring on the shaft
- Attach the L brackets to the column & then to the structure
- Slide the cap and base in place
- Align the neck ring using the provided template
- Caulk the seams and paint

It's just that simple!

TimeSaver C&B is made from 95% recycled fiber reinforced ABS. We designed these patent pending C&B with pressure tabs which not only center the C&B perfectly they eliminate the need to use fasteners to hold the C&B in place.

This is a rolling change. The item number and pricing will remain the same as the original 8" cap & base options.
